

QUICK START GUIDE

Thank you for your recent purchase of Hydro Mousse™ Liquid Lawn formula. For best results, please read and follow these instructions carefully.

Your purchase will allow you to seed approximately 100 sq. ft. (10 m²) for over seeding and repairing existing lawns. Included: **The Hydro Mousse™ canister** with **spray head**, 250gr of special **grass seed mixture**, water hose **connector** and the **Liquid Mousse™** formula, 59ml (2 fl. oz.)

GROUND PREPARATION:

- Prepare your soil by loosening approximately the top 3" (7cms) and eliminate any debris or dead grass from the ground.
- Rake the soil to aerate and level the ground as desired.
- Avoid pressing, compacting or walking over the ground once prepared and ready.

HYDRO MOUSSE™ PREPARATION:

- Select the area to seed and if you want a new lawn or over seed/repair existing lawn.

	Seeding New Lawns	Seeding New Lawns	Over Seeding existing lawns or repairing spots	Over Seeding existing lawns or repairing spots
	SEEDS	LIQUID MOUSSE™	SEEDS	LIQUID MOUSSE™
25 sq. ft./ 3 m ²	¼ canister (mark 1) 125 gr	¼ bottle		
50 sq. ft./ 6 m ²	½ canister (mark 2) 250 gr	½ bottle	¼ canister (mark 1) 125 gr	¼ bottle
75 sq. ft./ 7 m ²	¾ canister (mark 3) 375 gr	¾ bottle		
100 sq. ft./10 m ²	1 canister (mark 4) 500 gr	1 bottle (59ml)	½ canister (mark 2) 250 gr	½ bottle
150 sq. ft./14 m ²			¾ canister (mark 3) 375 gr	¾ bottle
200 sq. ft./19 m ²			1 canister (mark 4) 500 gr	1 bottle (59ml)

- Pour the selected quantity of **special grass seed mixture** and **Liquid Mousse™ formula** into the canister.
- Attach the Hydro Mousse™ **spray head** and **screw on tightly**. Make sure the dial is on the left hand side **"0"**.
- Now you can **connect** your Hydro Mousse™ canister to your **garden hose** safely and proceed to turn on the water tap.
- Turn the Hydro Mousse™ canister **upside down gently** a few times, to ensure the grass seed mixture and the Liquid Mousse™ formula are evenly mixed.
- Turn the dial to the **water tap symbol** on the spray head. This will ensure that the canister is filled with water to its maximum capacity.
- Allow the **seeds to stand for a few minutes in cold tap water**. This will quickly replenish moisture and awaken the natural nutrients in the grass. Do not rinse or change the water to maintain a good and fertile sowing.
- Now you're ready to select and slide the dial onto **"1" light seed** or **"2" heavy seed**. Please note you have an additional **"0"** position between these, to facilitate changing your selection with ease.
- During the seeding process, you may gently alternate your Hydro Mousse™ canister upside down once or twice to ensure all seed is used.

ADDITIONAL NOTES & HELPFUL TIPS

- It is recommended to keep the soil **fairly wet** for the next **7 to 14 days** by lightly watering 2 or 3 times a day. Do not saturate the ground with water as this will be counterproductive.
- Wash your hands thoroughly with soap after every use.
- In the event of contact with eyes, rinse thoroughly with water and if irritation persists please consult your doctor.
- Please wait until new grass is approximately three inches before mowing.
