

**Extender Ring**

The Flavorwave Oven<sup>®</sup> Express<sup>™</sup> Extender Ring makes it possible to cook small turkeys, chickens, hams etc. Insert the Extender Ring between the glass bowl and the lid and increase the height of the Flavorwave Oven<sup>®</sup> Express<sup>™</sup> by an additional 2.5" (6cm).

**Warning:** Do not touch the Extender Ring, glass bowl and lid or any surfaces on the heater assembly during operation. The air inside the cooking bowl reaches a temperature of approximately 230°C/446°F which makes the surface very hot and may cause burns. Wait until the Flavorwave Oven<sup>®</sup> Express<sup>™</sup> and Extender Ring cool before removing from or touching the oven.
