STOP
This message about... Ground Fault Circuit Interrupters ...can save a life!

IF YOU MUST USE YOUR STRAIGHTENING IRONS IN THE BATHROOM, INSTALL A GFCI* NOW!
Your local electrician can help you decide which type is best for you – a portable unit that plugs into the electrical outlet or a permanent unit installed by your electrician. The National Electrical Code now requires GFCIs in bathrooms, garages, and outdoor outlets of all new homes.

WHY DO YOU NEED A GFCI?
Electricity and water don't mix. If your straightening iron falls in water while it's plugged in, the electric shock can kill you... even if the switch is "off."
A regular fuse or circuit breaker won't protect you under these circumstances. A GFCI offers you far greater protection.
A GFCI can save your life! Compared to that, the price is small!
Don't wait... install one now!
*GFCI is a sensitive device which reacts immediately to a small electric current leak by stopping the electricity flow.

Thank you for purchasing the California Beauty® Steam Styler™, the new multi-purpose professional hair iron with a unique Steam-mist technology.

The Steam-mist technology provides the right amount of steam to help protect your hair and improve the straightening or curling effect. Variable heat control allows you to choose the temperature that's appropriate for your hair. The on-off switch is conveniently placed so the unit cannot be switched on by accident. The high quality plates move smoothly over your hair and the spring-loaded handle allows you to choose exactly how much pressure you need in order to style your hair. The tips of the flat and waved plates can be pinched together for creative detailing and the irons can be used to create volume and the latest hairstyles from flips to bobs to straight.

9. Storage
Unplug the CB Steam Styler™ and let it cool off before storing. If storing for long time, empty water tank. Place CB Steam Styler™ and all accessories back into the box and store out of reach of children in a safe, dry location. NOTE: Avoid any contact between the hot ceramic plates and the power cord. Do not wrap cord around the appliance. Use the pouch (optional item) provided to store CB Steam Styler™, plates and accessories.
8. Product Cleaning and Care

FOR BEST RESULTS USE DISTILLED WATER

To ensure the proper function and performance of your CB Steam Styler®, clean the appliance regularly:

1. Disconnect the appliance from the electrical outlet (socket) and wait until the CB Steam Styler® has cooled off.
2. Clean the CB Steam Styler® and all accessories with a slightly damp cloth. DO NOT Immerse CB Steam Styler® in water.
3. Use the cleaning brush to clean inside the plates holes.
4. Wipe all CB Steam Styler® parts dry with a dry cloth.

Cleaning Mineral Deposits:

One common problem with all steamers is mineral deposit caused by a high mineral content in many municipal water suppliers. Mineral residue inside of the internal pipes and heater can cause intermittent steaming or, in some cases, no steaming at all.

NOTE: To reduce or eliminate the occurrence of mineral deposit, we recommend the use of de-mineralized or distilled water. However, regular tap water can also be used. The section below can be used to reduce mineral deposit. If not using de-mineralized or distilled water, we recommend you follow this procedure monthly:

1. Disconnect the appliance from the electrical outlet (socket) and wait until the CB Steam Styler® has cooled off.
2. Mix a solution of 50% vinegar and 50% water; and pour it into the water tank chamber.
3. Allow it to stand for 40 minutes.
4. Drain the solution out from the water tank into a sink.
5. Pour clean water in the water tank, drain, and repeat until the vinegar odour dissipates.

NOTE: Do not use any harsh cleaning agents or abrasives.

2. IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances, basic safety precautions should always be followed, especially when children are present, including the following:

READ ALL INSTRUCTIONS BEFORE USE

Please read these safety instructions carefully before you begin using the CB Steam Styler®. This will safeguard you from any potential hazards and the appliance from damage caused by incorrect operation. This appliance should only be used with products designed for use with heated hair styling/straightening irons.

WARNING - Failure to comply may result in serious injury. To reduce the risk of burns, electrocution, fire, or injury to persons:

1. Always unplug this appliance immediately after use.
2. Do not use while bathing. For cleaning refer to the "Cleaning and Care" section of this manual.
3. DO NOT touch hot plates. The high temperature could cause serious burns. Always allow to cool off completely once switched off.
4. Do not use this appliance near bathtubs, showers, basins or other vessels containing water.
5. Don’t allow dripping wet hair to come into contact with this appliance.
6. Do not use the appliance with wet or damp hands.
7. Make sure the appliance is connected to an outlet (socket) having the same electrical configurations as the plug.
8. As with most electrical appliances, electrical parts are electrically “live” even when the power switch is set to “OFF” position. Do not disassemble the product even when it is turned off.
9. Do not place in or drop into water or other liquid.
10. Do not reach for an appliance that has fallen into water. Unplug immediately.
11. An appliance should never be left unattended when plugged in.
12. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning the use of the appliance by a person responsible for their safety.
13. Children should be supervised to ensure that they do not play with the appliance.
14. Use this appliance only for its intended purpose as described in this manual. Do not use attachments not recommended by the manufacturer.
15. If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly trained person to avoid a hazard.
For Thick Hair:
Part the hair into four 1 or 2-inch (2.5-5 cm) sections. Start flat ironing each section of the hair from the nape or back of the neck and move towards the front. This will give you more control.

For an Evening Look:
Use the double plate and section the hair into 9 large sections. Start at the nape or back of the neck and roll the hair under steaming as you go. Hold it for a couple of seconds at the end, this allows for a good strong hold.

Resistant / Curly Hair
Part the hair into four 1 or 2-inch (2.5-5 cm) sections, pull the comb through as you flat iron. This will help straighten the hair out more.

For Coarse / Thick Hair
Be sure to use smaller sections.
7. CB Steam Styler™ Styling Tips

**General Rule**

Take a 1 or 2-inch (2.5-5cm) section of hair (2 in front / 2 in back) and clamp the Steam Styler™ down as close to the scalp as possible. Slowly pull iron down the length of the hair (Be sure to read the directions to see what heat setting you should have the iron on and how long to keep the iron on hair).

**Flat Straight**

Insert a 2-inch (5 cm) section of hair between the plates, then squeeze the handle together and glide slowly through hair from the roots to the ends.

**Soft Curls**

Insert a 2-inch (5 cm) section of hair between the plates gently squeeze handle together and glide iron to the ends, then wind hair around plates.

For 120V units equipped with ALCI plug only

Check ALCI every time you use the CB Steam Styler™.

This straightener is equipped with an Appliance Leakage Circuit Interrupter (ALCI), a safety feature that renders it inoperable under some abnormal conditions, such as immersion in water. To make sure the ALCI is functioning properly and the exclusive water sensing system (ALCI) is working, perform the following test.

1. Plug in straightener and press test button on plug.
2. Straightener will stop working. There will be an audible click and reset button will pop out.
3. To reset ALCI with a reset button: Unit should be unplugged. Then push reset button in, and reinsert plug into outlet.
4. Be sure to repeat test every time you use straightener to confirm ALCI is operational.
5. If ALCI is not functioning properly, return straightener to service center.
6. It is important that if immersion occurs, this unit be brought to a service center. Do not try to reset. Should the straightener go off and the reset button pop out during use, this could indicate a malfunction in the straightener. Remove plug from outlet and allow the dryer to cool. Reset the ALCI. Reinsert plug into outlet. Straightener should function normally. If not, return to service center for examination and repair.
3. California Beauty® Steam Styler™ Product Features

Steam Button – steam is produced when the steam button is pressed down.
Water Tank – detaches for easy fill. Use either distilled water or hot/cold tap water.
Light Indicator – indicates the CB Steam Styler™ is “ON” when lit. When blinking indicates the CB Steam Styler™ is heating up.
Temperature Regulator – regulates the temperature by turning Temperature Regulator Button clockwise.
Flat Plates – included for straightening and quick touch-ups.
Cleaning Brush – use for cleaning plates.

Rating: ETL/cETL – 120V 60Hz 180W
GS – 220-240V 50-60Hz 145W

Steam Button Water Tank Light Indicator Flat Plates Cleaning Brush

normal to thick hair 8 seconds). NOTE: The combination of heat and steam gives the hair body and ensures long lasting results.
6. Open the plates and allow the strand to gently glide out.
7. Repeat steps 5 to 6 on the remaining sections of hair.
8. To achieve the desired result you may need to repeat the process.
9. To release steam, press the steam button. Make sure the CB Steam Styler™ is 3 inches (7-8 cm) away from the scalp.

The appliance has no automatic steam function, but as long as the steam button is pressed the steam will be released.

Using the Hair Crimper
1. Wash your hair thoroughly (optional), dry and comb it straight.
2. Apply hair styling lotion in moderate quantities (optional).
3. Insert the hair crimper plates. Turn the CB Steam Styler™ on and let it heat up.
4. Split your hair into approximately 9 inches (5 cm) wide strands and place each section of hair between the heated plates as close as possible to the hairline. CAUTION: Be careful not to get burnt.
5. Close the plates down with the hair in between. Hold the appliance in this position according to your hair type (thin hair 5 seconds, normal to thick hair 8 seconds). NOTE: The combination of heat and steam gives the hair body and ensures long lasting results.

The appliance has no automatic steam function, but as long as the steam button is pressed the steam will be released.
6. Open the plates and allow the strand to gently glide out. Crimp your hair down from the hairline to the end of the strand.
7. Repeat steps 5 to 6 on the remaining sections of hair.
8. To achieve the desired result you may need to repeat the process.
9. To release steam, press the steam button. Make sure the CB Steam Styler™ is 3 inches (7-8 cm) away from the scalp.

The appliance has no automatic steam function, but as long as the steam button is pressed the steam will be released.
NOTE: Do not stop for more than two (2) seconds at any one point on the section being styled. Whichever technique you use, repeat the process a few times for smooth, shiny and silky hair. Normally one pass would be sufficient.

9. For the final finish shake your head lightly and comb backward.
10. To release steam, press the steam button. **Make sure the CB Steam Styler™ is 3 inches (7-8 cm) away from the scalp.** The appliance has no automatic steam function, but as long as the steam button is pressed the steam will be released.

**Using the Detangler**

1. Wash your hair thoroughly (optional), and dry it.
2. Prepare the CB Steam Styler™ by inserting detangler plate (this plate is used in combination with flat plate with holes).
3. Separate out a tangled section of hair. Place it between the open plates. CAUTION: Be careful not to get burnt.
4. Gently close the plates with the hair in between.
5. Slowly glide CB Steam Styler™ forward from the hairline to the end of the hair section to unlock knots and detangle hair.
   NOTE: Repeat the process a few times for smooth, shiny and silky hair. Normally one pass would be sufficient.
6. To release steam, press the steam button. **Make sure the CB Steam Styler™ is 3 inches (7-8 cm) away from the scalp.**
   The appliance has no automatic steam function, but as long as the steam button is pressed the steam will be released.

**Styling Wavy Hair**

1. Wash your hair thoroughly (optional), dry and comb it straight.
2. Apply hair styling lotion in moderate quantities (optional).
3. Insert either one waved or multiple waved plates, depending on the amount of waviness you want. Turn the CB Steam Styler™ on and let it heat up.
4. Split your hair into approximately 2 inches (5 cm) wide strands and place each section of hair between the heated plates as close as possible to the hairline. CAUTION: Be careful not to get burnt.
5. Close the plates down with the hair in between. Hold the appliance in this position according to your hair type (thin hair 5 seconds,
5. Operating Instructions

Please read these operating instructions carefully before you begin using the CB Steam Styler™. In no event will the product supplier or manufacturer be liable for any special, incidental or consequential damages by incorrect operation.

Preparing CB Steam Styler™

1. Remove the Water Tank located in the middle of the CB Steam Styler™ by pulling it out. NOTE: The CB Steam Styler™ should be unplugged.
2. Open the water tank chamber by pulling out the rubber plug. Fill it with either distilled water or hot/cold tap water. Do not use any other liquids. To reduce or eliminate the occurrence of mineral deposit, we recommend the use of demineralized or distilled water in the main unit. However regular tap water can also be used.
3. Close the rubber plug and put the filled water tank back by snapping into place.
4. Choose appropriate pair of plates, make sure the plate with "up" go on top and the plate with "down" go on the bottom. To change plates press the release buttons on each side of the plate and slide it out or in.
5. Place the CB Steam Styler™ on its non-slip rubber base onto an even surface, and plug into the wall socket. Test safety plug (120V) units only.
6. Turn the Temperature Regulator to the temperature setting that is most suited to your hair.
7. For first-time users, those with fine hair or chemically treated hair or if you are unsure of your hair condition, it is advisable to start with a lower temperature setting (1-4). Do not heat to setting 5 or above as it could damage your hair.
   • For normal hair use middle temperature. Turn the temperature regulator button clockwise to "8" to reach the middle temperature between 300°F to 340°F (150°C to 170°C).
   • For healthy, thick and coarse hair, it is safe to apply more heat with the max temperature setting to "10" between 375°F to 410°F (190°C to 210°C).
8. The LED light will blink while the CB Steam Styler™ is heating up. The light will stop blinking once the exact operating temperature is reached. The CB Steam Styler™ is set to the optimum temperature for your hair and this temperature is constantly maintained.
   NOTE: The unit can also be used without the steam.
9. To release steam, press the steam button. Make sure the CB Steam Styler™ is 3 inches (7-8 cm) away from the scalp.

6. Hair Styling

Hair Straightening

1. Wash your hair thoroughly (optional), dry and comb it straight.
2. Prepare the CB Steam Styler™ by inserting flat plates.
3. Separate out a section of hair - width of 3 fingers; the thinner the section, the more evident the result.
4. Apply hair styling lotion in moderate quantities (optional)
5. Place each hair section, one at a time, between the open straightening plates, as close as possible to the hairline.
   CAUTION: Be careful not to get burnt.
6. Gently close the plates with the hair in between.
7. Slowly glide CB Steam Styler™ forward from the hairline to the end of the hair section, and then let hair hang in front of your face.
   NOTE: Do not stop for more than two (2) seconds at any one point on the section being styled. Whichever technique you use, repeat the process a few times for smooth, shiny and silky hair. Normally one pass would be sufficient.
8. To release steam, press the steam button. Make sure the CB Steam Styler™ is 3 inches (7-8 cm) away from the scalp.
   The appliance has no automatic steam function, but as long as the steam button is pressed the steam will be released.

Hair Volume

1. Wash your hair thoroughly (optional), dry and comb it straight.
2. Prepare the CB Steam Styler™ by inserting flat plates.
3. Separate out a section of hair - width of 3 fingers; the thinner the section, the more evident the result.
4. Apply hair styling lotion in moderate quantities (optional)
5. Place each hair section, one at a time, between the open straightening plates, as close as possible to the hairline.
   CAUTION: Be careful not to get burnt.
6. Gently close the plates with the hair in between.
7. Rotate using an upward motion to lift the lower section of your hair from the scalp and create volume.
8. Slowly glide CB Steam Styler™ forward from the hairline to the end of the hair section, and then let hair hang in front of your face.
